Taylor,

The process should be that ORD sends this to the OMB desk officer, who then formally requests for us to

upload a clean version into ROCIS, which we will do. Please to send to us the NOA FRN that will accompany this action OP staff can do a FRN review.

Thanks
Kevin

Good morning & happy Friday!

1. Attached is the final redline tox assessment ready to go back to OMB. Some edits were made to FNs 10 and 12 to respond to DOD's comment. I also added the response to DOD's comment in the attached response to comments doc as DOD comment #4.
 - Since OCSPP & ORD have responded to all comments now, **OP – please send these docs back to OMB ASAP**. Since these comments were fairly minor and have all been addressed, please **request that they clear by 11am today**.
2. Also attached is the NOA for the FR. We need the **docket # and contact person ASAP**.
 - **ORD** – Please provide this info **within the hour**.
 - **OP** – Once we have that info, please be prepared to send over **ASAP**.

If you have any questions at all, please don't hesitate to give me a call.

THANK YOU ALL!

Subject: RE: PFAS Tox Values: OCSPP Review

Taylor,
Please see the assessment and response to comments attached to this email. The response to comment document covers comments from HHS and DOD that were included in the body of emails from OMB. There is one outstanding comment from DOD that remains to be addressed:

DOD

It is EPA's prerogative to address science policy issues, but to state on pages 76 and 78 that "The selection of UFs is a science policy judgement and therefore not the subject of outside peer review." is entirely inconsistent with the charge questions used in the two rounds of external peer review. It is also inconsistent with the scores of toxicological assessments whose interagency review we have engaged. Both times for PFBS, EPA asked the external peer reviewers to opine on the UFs and it is notable that each time the panel was in agreement with the UFDs applied. To say now that UFs are not subject to external peer review is disingenuous and also is precedent setting, we recommend this be deleted.

Response: EPA appreciates the DOD's comments. EPA acknowledges that the Agency asked peer reviewers for input on the uncertainty factors used in the draft document. However, EPA has determined that the application of uncertainty factors penultimately involves science policy judgment. As such, EPA will retain the added language regarding the application of uncertainty factors.

Neither ORD nor OCSPP are in a position to address this comment. At this point, you can resolve any remaining issues and continue any subsequent discussion with OMB.

With respect to the FRN, I believe David Dunlap and Lindsey Jones offered to handle development of that document. Angela and Peter should work with them on the development of the NOA.

Thanks,
Lou

Subject: RE: PFAS Tox Values: OCSPP Review

I just saw the first draft of the NOA from OCSPP – Thank you OCSPP for the quick turnaround! Now onto the remaining items –

I heard that OP was giving conflicting direction despite my coordination with OP. If that is the case, please loop me into those conversations this evening so we can immediately set up a conference call to resolve any misunderstandings. Please make me aware of any specific issues immediately.

Further, I don't need the feedback from DoD or HHS in one doc – just simply forward me what you received. That should only take a few minutes.

I'll be on standby to continue following up with you all until I hear back on these items.

On Jan 8, 2021, at 4:52 PM, Hoverman, Taylor <hoverman.taylor@epa.gov> wrote:

All,

Great news! To address the concern raised yesterday, OMB has agreed to conduct expedited review of the PFBS toxicity assessment to help make this happen! I hate to do this to you on a Friday evening, but OMB needs this to go into ROCIS today. I am attaching the redline that included OCSPP's edits. I accepted edits to spacing only and kept all other changes in redline and made 1 editorial change to incorporate OCSPP's comment. The same change was made on pages 77 and 79.

Since we have a window of opportunity to get this across the finish line, I appreciate your help doing so. Please give me a call if you need any additional help from me to get this done.

Thank you all in advance!

Subject: RE: PFAS Tox Values: OCSPP
Review

Taylor, Alex and I spoke last night and
you should connect with her. I was not
aware of the discussion with the
Administrator and I believe he did not
have complete information in that
discussion.

ORD will not be able to make this change and have this document go out next week. ORD's document for PFBS was considered final when the OCSPP comments were received. The type of changes OCSPP proposes would require us to go through the whole process of intra/inter-agency review and WH Technical workgroup review which will take anywhere from 6-8 months.

Happy to talk further

Subject: RE: PFAS Tox Values: OCSPP Review

Thanks for looping me in, Alex.

Yes, Tala's emails are correct. Since the Administrator has already weighed in, I assume the remaining step is to incorporate OCSPP's edits. I understand that once these changes are incorporated, the PFBS final toxicity assessment will be ready to post online.

The Administrator has a PFAS interview next Thursday. The PFAS regulatory determination should be published next week, and since this is so close to completion, I would really like us to get this tox assessment finalized before then as well, so he can highlight both actions in that interview.

This week, I have seen both a thank you note to ORD + R5 from Ohio EPA for assistance with PFAS work (Great work, ORD + R5!), as well as this InsideEPA article: <https://insideepa.com/daily-news/new-jersey-dep-chief-mccabe-faults-epa-lack-pfas-class-policy><<https://gcc01.safelinks.protection.outlook.com/?url=https%3A%2F%2Finsideepa.com%2Fdaily-news%2Fnew-jersey-dep-chief-mccabe-faults-epa-lack-pfas-class-policy&data=04%7C01%7Choverman.taylor%40epa.gov%7Cb587c096eedc4c2737c308d8b33c3e6f%7C88b378b367484867acf976aacbeca6a7%7C0%7C0%7C637456418606001285%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6IklhaWw%7CjXVCI6Mn0%3D%7C1000&sdata=n1OVFe nTviY4UcyTHdGgR9d9nPdDTIKTJFJB4pV%2FQZc%3D&reserved=0>>

I think next week's interview is a great opportunity for the Administrator to highlight the hard work across all EPA program offices and regions addressing PFAS and would really love if we could quickly get OCSPP's edits incorporated to add this tox assessment to the list of accomplishments.

If this is not possible, please call me

today to discuss why additional time is absolutely necessary.

Thanks so much!

Importance: High

Sam/Betsy,
As you know OCSPP Toxicologists reviewed the PFBS and GenX draft documents; our reviews/insights are attached in format appropriate for docketing (as I understand this is something the Administrator has requested).

Also attached are the documents that include OCSPP proposed in-line edits to address the OCSPP Sr Toxicologists review, specifically relative to consideration alternative UFs, to support presentation of a range of UFs (and therefore RfDs), which I also understand the Administrator requested be included.

Please let me know if you have

questions.
